Security of one its security of all

The anti-virus industry has a

25 BILLION DOLLAR MARKETCAP

that continues to grow 9% annually.

BUT THERE ARE PROBLEMS

1

OUTDATED:
Existing solutions require end-users to individually install specific anti-virus software, and maintain their threat database via frequent updates.

2

SHORT SIGHTED:
Modern anti-virus software emphasizes protecting users from known virus threats, rather than preventing attacks that may arise in the future.

3

EXPENSIVE:
Trusted software often costs $50 or more annually, despite only providing low efficiency threat detection.

4

FRAGMENTED:
Redundant software options have made it impossible for consumers to trust the effectiveness & speed of response of any single program.

LEVELNET IS THE SOLUTION

LevelNet solves each of these problems at a fraction of the cost by combining the efforts of pre-existing anti-virus software to form a p2p security network, accessible through our proprietary app. By securely distributing verified information between users, we protect the whole network from digital threats in real-time.

HOW IT WORKS

Threat detection is performed by monitoring the security software installed on each users device. Responses are checked against our dynamic whitelist and analyzed by our client program. Users are then notified of any suspicious files that match threats detected elsewhere on the network.

1. When a new threat is blocked by a user's anti-virus software, Levelnet records data about the attack and distributes information about the incident to available nodes on the network.
2. Each node checks and rechecks the information's validity against an aggregated database.
3. The result is returned to the nodes, who share valid discoveries with all users on the network.
4. LevelNet End-Point Security App blocks all future instances of the threat across our entire network of users, regardless of the anti-virus software each user has installed.

BUSINESS MODEL

How we make money: LevelNet will be free for the first 24 months, and is expected to reach 100 million connected devices within 5 years. After reaching a customer base of one million members, LevelNet will evolve into a freemium payment model.

There will be three consumer subscription tiers; Free, Basic for $0.99 per month, and Premium features for $9.99 per month.

Business users pay $99.99 per month for inclusive corporate use.

Annual paid subscription for using API for corporate users to access the reputation database.

ICO PHASE ONE

ACCESS	BUY BACK FUND	MONEY BACK FUND	EXCHANGE ONE	EXCHANGE TWO
LVL tokens can be used to access all products and services associated with the LevelNet ecosystem.	A smart contract will regularly buy back tokens from the market via digital exchanges.	A smart contract programmed to send each contributor a one-time payment.	Utility LVL token to equity LVLS token	LVL tokens exchanged for subscriptions to LevelNet services or products, and subsequent resale to corporate users.

ICO PHASE TWO

ACCESS	ACTIVE PARTICIPATION
LVLS token provides access to the fund's profit and to the shareholder register.	As a token holder you will have the opportunity to nominate a representative to the Board of Directors

LEVELNET ROADMAP

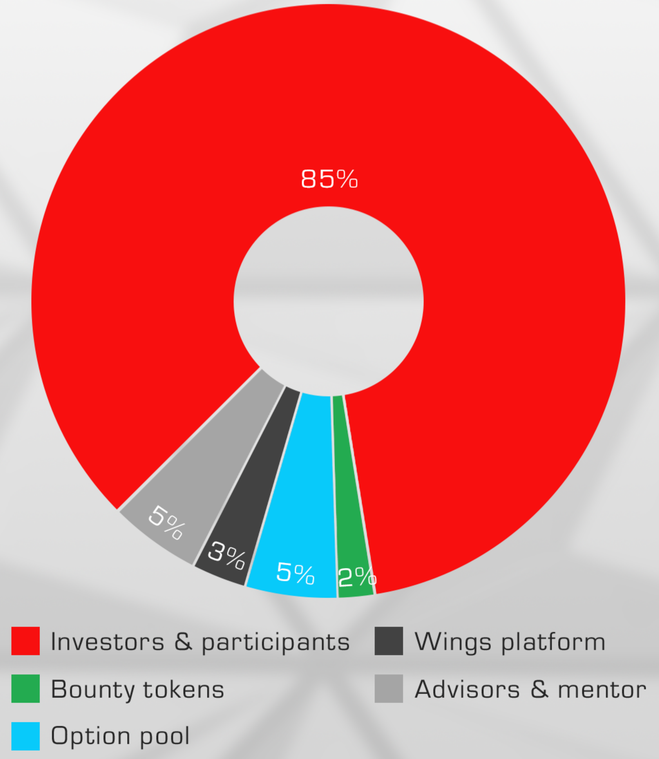
October 17, 2017	PRE-SALE
October 30, 2017	ICO
November 2017	EXCHANGE LISTING
February 2018	START PAYOUT
May 2018	ALPHA VERSION
May 2018	START TOKEN EXCHANGE
August 2018	END TOKEN EXCHANGE
August 2018	OPEN BETA
November 2018	ELECTION OF BOARD MEMBERS
October 2018	CANDIDATE VERSION
November 2018	RTM

TOKEN PRICING & DISTRIBUTION

We have developed a flexible pricing system, designed to make the acquisition of tokens by first investors more advantageous.

Name	Bonus	Round duration	Token price ($)	Tokens for sale (%)	Tokens for sale (quantity)
Pre-sale	40.00%	15 days	$ 0.60	30%	21000000
Round 1	25.00%	48 hours	$ 0.75	20%	14000000
Round 2	15.00%	2-10 days	$ 0.85	20%	14000000
Round 3	10.00%	11-15 days	$ 0.90	15%	10500000
Round 4	5.00%	16-20 days	$ 0.95	5%	3500000
Round 5	2.00%	21-25 days	$ 0.98	5%	3500000
Round 6	0.00%	26-30 days	$ 1.00	5%	3500000
Total				100%	70 000 000

Issued tokens are subject to distribution as follows:



PRE-SALE OFFER

For people interested in joining our Pre-Sale, the minimum contribution is BTC or ETH valued at $25,000.

CONDITION ONE:
$50,000 and above receives a discount of 40%

CONDITION TWO:
$25,000 to $50,000 receives a discount of 30%

FUND DISTRIBUTION

MONEY BACK	BUY BACK	DEVELOPMENT AND IMPLEMENTATION	OPERATIONS	RESERVE
A fund formed at investor's expense, whose size depends on the number of tokens sold during the token offering.	A smart contract will regularly buy back tokens from the market via digital exchanges.	The fund's objective is the development, administration and management of the LevelNet project.	In order to increase the success of the token offering, we have concluded agreements to allocate commission fees to our partners.	This fund covers common losses in the absence of other possibilities for their coverage.
